

Expo Frío y Calor Fair Chile 2016

11/05/2016 - 13/05/2016

Santiago - Chile

Although small, the fair presents great potential for the sector, once it will be held in Chile, which is also the project's target market. The Chilean market has been turning into the main destination of Brazilian companies' exports, with high interest of the Program's participant companies, once the country brings modern changes within great local infrastructure constructions.

I WANT TO PARTICIPATE
