PROJETO COMPRADOR EXPOSOL / SOLEDADE 2017

10/07/2017 - 14/07/2017

Soledade - RS

The action geared toward the stone accessories segment will feature a virtual showroom, which will help promote the industrial center and drive business in the segment. The stone accessories segment in Brazil has unusual characteristics that make international fairs unattractive to local companies. Historically, buyers have traveled to the main manufacturing center in Soledade, Rio Grande do Sul, and international markets continue to be the main destination for the center's products.

I WANT TO PARTICIPATE
