

Refriaméricas Fair 2016

02/06/2016 - 03/06/2016

Cidade do Panamá - Panamá

The Refriaméricas Fair constituted itself throughout its editions as one of the most important fairs of the refrigeration and cooling sector, including exhibitors of industrial and commercial cooling. Since 2014, the fair included the segments of air conditioning and ventilation, because of the importance and the growth of other countries' participation. Such strategy contributed to a significant raise of new exhibition companies, once it encompasses new segments of the HVACR sector.

I WANT TO PARTICIPATE
